ADRIÀ MARATA

IT STUDENT

PROFILE

I'm an 18 year old first year student on Information Technologies at Epitech Barcelona. I work very hard, learn fast and I'm always ready to take new challenges and learn new things. I like to consider myself a really consistent and self-concious person that can always rely on his deductive reasoning skills. Moreover, I'm easy-going and comunicative, which makes it easy for me to fit in any team. Furthermore, my studies are completely practice focused so I already have a lot of programming hours on my back although I'm only a first year student. Also I have worked for up to 14 hours a day so hard work and last minute issues won't become a problem for me. As much as I love to work, I also like playing tennis, padel, cycling, traveling and reading on my free time.
